

Job Description

SAP started in 1972 as a team of five colleagues with a desire to do something new. Together, they changed enterprise software and reinvented how business was done. Today, we remain true to our roots. That's why we engineer solutions to fuel innovation, foster equality and spread opportunity for our employees and customers across borders and cultures. SAP values the entrepreneurial spirit, fostering creativity and building lasting relationships with our employees. We believe that together we can transform industries, grow economics, lift up societies and sustain our environment.

The Opportunity: Intern (f/m/d) for SAP Product Development

The SAP Technology & Innovation (T&I) board area is responsible for SAP's overall platform and technology development such as SAP Cloud Platform and SAP HANA. In addition, T&I drives the incubation and adoption of intelligent technologies like Analytics, SAP Leonardo Machine Learning and Internet of Things (IoT) across SAP's product portfolio.

You will be part of a technology-focused team that was built to help shape the future generations of SAP software. In this role you will have the great opportunity to conduct and support the SAP Graph project, which has great external visibility. The strategic purpose is to address the complexity of having to work with a multitude of APIs by creating a unified API layer across SAP applications. At SAP we have diversity at heart, so you will also be able to work with the brightest minds from a multitude of cultural and ethnical backgrounds.

Being a competent member of the SAP Graph team, your tasks will include but are not limited to:

- Contributing to feature development
- Improving test automation and quality assurance

Skills & Requirements:

- Student (f/m/d) at a university or university of applied sciences
- Studying preferably in the fields: Computer Science, Software Engineering or a related
- Computer Skills:
 - Solid foundation in computer science and software engineering methodology
 - Solid programming skills, preferably in node.js, go, typescript
 - Experience in working with cloud native technologies like Kubernetes, Docker, Helm, Istio
 - Experience with web-based API practices like REST, OpenAPI Specification, GraphQL, OData, JSON
- Language skills: Fluent in German or English (written and spoken)
- Soft skills:
 - Eager to learn and hands-on working mentality
 - Strong team working skills, reliable and open-minded
 - Determined to reach a goal in time, ability to work independently and to prioritize tasks

Success is what you make it. At SAP, we help you make it your own. A career at SAP can open many doors for you. If you're searching for a company that's dedicated to your ideas and individual growth, recognizes you for your unique contributions, fills you with a strong sense of purpose, and provides a fun, flexible and inclusive work environment.
