

Job Description

SAP started in 1972 as a team of five colleagues with a desire to do something new. Together, they changed enterprise software and reinvented how business was done. Today, we remain true to our roots. That's why we engineer solutions to fuel innovation, foster equality and spread opportunity for our employees and customers across borders and cultures. SAP values the entrepreneurial spirit, fostering creativity and building lasting relationships with our employees. We believe that together we can transform industries, grow economics, lift up societies and sustain our environment.

The Opportunity:

Intern / Working Student (f/m/d): Product Design for Strategic Projects

As a software development student in our Strategic Projects Team you will have the chance to work on a variety of projects, that will showcase the value of our SAP technology portfolio. Under the supervision of a senior designer you will have the chance to directly interact with customers and users to perform all necessary tasks from user research / user testing, experience mapping up to high fidelity UI designs and prototypes. You will have the chance to directly work with an agile group of students with a tech and design background to bring ideas together and jointly ship real applications to real end users.

We are looking for a design student with a broad understanding of the whole UX and UI design process and the ability to join a software development project at every stage in the process to craft what is needed to deliver a great experience to real end users. Beyond your main project, you will also be invited to explore and support other activities of our team, such as designing executive keynotes and further short term, high-profile project requests.

Skills & Requirements:

Student (f/m/d) at a university or a university of applied sciences, preferred field(s) of study: Interface Design, User Experience Design, Interaction Design or a related field

Required Skills:

- Ability to translate user insights into testable prototypes and real applications
- Good understanding of the design process, related methodologies and skills such as:
 - User research and usability testing
 - Experience mapping, Service Design Blueprints
 - Visual Design, Design Sprints
 - Mockups and wireframes in all kind of fidelities
- Savvy in working with common design tools (Sketch, Invision, Figma, Framer and/or Adobe CC)
- Fundamental knowledge of aesthetics and perceptual psychology as well as a good sense of beauty in UI and communication design
- Fluent in German and English (written and spoken)

Preferred Skills:

- Basic understanding of HTML and CSS is a plus
- Basic understanding of multimedia production and animation by using Adobe Premiere and After Effects is a plus

Soft skill

- Interest in new technologies
- Hands-on, reliable and open-minded mentality
- Strong team working skills
- Determined to reach a goal in time, to work independently and to prioritize tasks

Success is what you make it. At SAP, we help you make it your own. A career at SAP can open many doors for you. If you're searching for a company that's dedicated to your ideas and individual growth, recognizes you for your unique contributions, fills you with a strong sense of purpose, and provides a fun, flexible and inclusive work environment.
